RE: SITE DRAINAGE

Dear Ken:

Attached is a letter from Dan Keppen with Klein and City of Seattle approval documents for the above referenced work. As noted, the documents are approved for construction (the noted "corrections and comments" have previously been incorporated into the revised drawings. These drawings must be available on site while under construction.

Of course the next course of action is to solicit bids and administer and coordinate the construction. Let me know if you require any assistance from us.

Sincerely,

Stephen Rinella, P.E.
